Astrobiology, formerly known as exobiology, is an interdisciplinary scientific field concerned with the origins, early evolution, distribution, and future of life in the universe. Astrobiology considers the question of whether extraterrestrial life exists, and if it does, how humans can detect it.. Astrobiology makes use of molecular biology, biophysics, biochemistry, chemistry, astronomy ...

Introduction. David C. Catling. Address: Department of Earth and Space Sciences/ cross-campus Astrobiology Program, University of Washington, Box 351310, Seattle, WA 98195. USA. I do research under the broad umbrellas of planetary science, geobiology or astrobiology. The last one, "astrobiology", is a new branch of science concerned with the origin and evolution of life on Earth, and the possible ...
