Falling into Theory is a brief and inexpensive collection of essays that asks literature students to think about the fundamental questions of literary studies today.

Since its publication in 1990, Critical Terms for Literary Study has become a landmark introduction to the work of literary theory—giving tens of thousands of students an unparalleled encounter with what it means to do theory and criticism. Significantly expanded, this new edition features six new chapters that confront, in different ways, the growing understanding of literary works as cultural practices. These six new chapters are "Popular Culture," "Diversity," "Imperialism/Nationalism," "Desire," "Ethics," and "Class," by John Fiske, Louis Menand, Seamus Deane, Judith Butler, Geoffrey Galt Harpham, and Daniel T. O'Hara, respectively. Each new essay adopts the approach that has won this book such widespread acclaim: each provides a concise history of a literary term, critically explores the issues and questions the term raises, and then puts theory into practice by showing the reading strategies the term permits. Exploring the concepts that shape the way we read, the essays combine to provide an extraordinary introduction to the work of literature and literary study, as the nation's most distinguished scholars put the tools of critical practice vividly to use.

Reading the Eighteenth-Century Novel is a lively exploration of the evolution of the English novel from 1688-1815. A range of major works and authors are discussed along with important developments in the genre, and the impact of novels on society at the time. The text begins with a discussion of the "rise of the novel" in the long eighteenth century and various theories about the economic, social, and ideological changes that caused it. Subsequent chapters examine ten particular novels, from Oroonoko and Moll Flanders to Tom Jones and Emma, using each one to introduce and discuss different rhetorical theories of narrative. The way in which books developed and changed during this period, breaking new ground, and influencing later developments is also discussed, along with key themes such as the representation of gender, class, and nationality. The final chapter explores how this literary form became a force for social and ideological change by the end of the period. Written by a highly experienced scholar of English literature, this engaging textbook guides readers through the intricacies of a transformational period for the novel.

This bestseller balances a comprehensive and up-to-date anthology of major documents in literary criticism and theory -- from Plato to the present -- with the most thorough editorial support for understanding these challenging readings.

In the conclusion of the trilogy retelling the story of Homer's "Iliad," the allies of the Mykene king Agamemnon, including a reluctant Odysseus, ruler of Ithaca, and the fierce warrior Achilles, gather to prepare a final onslaught against the Golden City of Troy. Reprint.
