Contrary to what most diets would have you believe, the human body does not recognize all calories as equal. Some foods are used to boost brain power, fuel metabolism, and heal the body—while others are simply stored as fat. In *The Calorie Myth*, Bailor shows us how eating more of the right kinds of foods and exercising less, but at a higher intensity, is the true formula for burning fat. Why? Because eating high-quality foods balances the hormones that regulate our metabolism. When we eat these foods, our bodies naturally maintain a healthy weight. But when we eat sugar, starches, processed fats, and other poor-quality foods, the body's regulatory system becomes "clogged" and prevents us from burning extra calories. Translation: Those extra 10 pounds aren't the result of eating too much . . . they're the result of eating the wrong foods! Bailor offers clear, comprehensive guidance on what to eat and why, providing an eating plan, recipes, and a simple yet effective exercise regimen. Losing weight doesn't have to mean going hungry or spending hours at the gym. *The Calorie Myth* offers a radical and effective new model for weight loss and long-term health.

Join the 27,000 people who have achieved dramatic and long-term weight loss with *The Setpoint Diet*, from the New York Times bestselling author of *The Calorie Myth*. Your body fights to keep you within a range of about 15 pounds -- also known as your "setpoint weight." New research reveals that you can lower your setpoint and end that battle for good by focusing on the quality of calories you eat, not the quantity. With *The Setpoint Diet*, you will reprogram your body with a 21-day plan to rev up your metabolism, eliminate inflammation, heal your hormones, repair your gut, and get your body working like that of a naturally thin person -- permanently. *The Setpoint Diet* is a lower-carb menu that focuses on specific anti-inflammatory whole foods, including tons of produce, nutritious proteins, and therapeutic fats. Its creator, Jonathan Bailor, founded SANESolution, a weight loss company that has reached millions of people. Proven to help you lose weight naturally

and maintain it, The SetpointDiet is your new blueprint for healthy living.

As our knowledge of the human body becomes ever more exact, scientists have made remarkable leaps forward in many fields. Yet for one question that many of us would like answered--What causes the body to burn fat?--we find all sorts of confusing claims. Since we know so much about how our body works, can't science tell us the answer? As it turns out, science already has. I have spent over ten years reading thousands of fat-loss studies. Not theories promoted by diet gurus. Only the proven data. My investigation uncovered all kinds of scientific findings: - Studies stating how certain foods cripple our ability to burn fat - Scientists showing how to burn fat while eating more food - Researchers revealing how to get all the benefits of traditional exercise in a tenth of the time - Physiologists finding out how eating less sets us up to gain fat in the long run - Doctors discussing how a few minutes of a new form of exercise immunizes us against fat gain - Endocrinologists explaining how we fix the underlying condition causing us to gain fat We deserve to know the proven facts about fat loss, but who has time to read tens of thousands of pages of scientific studies? The study took me more than a decade. It should not take you that long because the facts have been summarized in this book. They have also been simplified, so anyone who wants to lose weight can understand them. Make no mistake. Tons of clinical studies have shown the best way to trim off those unwanted pounds. It is time to stop listening to marketing myths about how to lose weight. We tried it. It failed. It is time to move on to a smarter science of slim. Proven and practical. Dr. Theodoros Kelesidis Harvard & UCLA Medical Schools The latest and best scientific research. Dr. John J. Ratey Harvard Medical School An important piece of work. Dr. Anthony Accurso Johns Hopkins Smart and health promoting. Dr. JoAnn E. Manson Harvard Medical School The last diet book you will ever need to buy. Dr. Larry Dossey Medical City Dallas Hospital Revolutionary, surprising, and scientifically sound. Dr. Jan Friden University of Gothenburg Compelling, simple, and practical. Dr. Steve Yeaman Newcastle University Stimulating and provocative. Dr. Soren Toubro University of Copenhagen Amazing and important research. Dr. Wayne Westcott Quincy College Brilliant. Will end your confusion once and for all. Dr. William Davis Fellowship of the American College of Cardiology, author of Wheat Belly Bailor's work stands alone. Maik Wiedenbach World Cup and Olympic Athlete Bailor opens the black box of fat loss and makes it simple for you to explore the facts. Joel Harper Dr. Oz Show fitness expert A groundbreaking paradigm shift. It gets results and changes lives. Jade Teta, ND, CSCS author of The New ME Diet
