These are the engine driven DC generator machines. To keep up with the times, Lincoln added a small AC generator for running modern "AC only" equipment. They also offer the machines with diesel power. The older SA 200's and 300's had COntinental Red Seal gasoline engines. This engine is no longer available, and is a 1930's side-valve design.

The Continental Cowley, shown to the press in April 1915, was a larger engined (1495 cc against 1018 cc), longer, wider and better equipped version of the first Morris Oxford with the same "Bullnose" radiator; in addition it could carry a four-passenger body. To reduce the price many components were bought from United States suppliers. The 1495 cc, side valve, four cylinder engine was made by ...
