new volume, he examines fire engineering and firefighting tactics to investigate how the ever-changing built environment is shaping current and future firefighting tactics, as well as how creative building design may assist firefighters in their work. In this book the author analyses 6,701 building fires occurring in the UK between 1984 and 2012. The outcomes of this research have effectively shaped specific national fire design guidance and firefighting tactics over the past twenty five years.

This on-the-job resource is packed with all the formulas, calculations, and practical tips necessary to smoothly move gas or liquids through pipes, assess the feasibility of improving existing pipeline performance, or design new systems. Contents: Water Systems Piping * Fire Protection Piping Systems * Steam Systems Piping * Building Services Piping * Oil Systems Piping * Gas Systems Piping * Process Systems Piping * Cryogenic Systems Piping * Refrigeration Systems Piping * Hazardous Piping Systems * Slurry and Sludge Systems Piping * Wastewater and Stormwater Piping * Plumbing and Piping Systems * Ash Handling Piping Systems * Compressed Air Piping Systems * Compressed Gases and Vacuum Piping Systems * Fuel Gas Distribution Piping Systems
