Over the course of the Industrial Revolution, mortality rates in Britain fell significantly and people started living longer. This might be surprising given that the newly crowded cities were rife with disease and illness—urban death rates were higher than rural death rates—but overall health improvements and better diets due to improved food production and livable wages offset that.

Public Health During the Industrial Revolution. One important impact of the industrial revolution (such as the use of coal, iron, and steam) was rapid urbanization, as new and expanding industry caused villages and towns to swell, sometimes into vast cities. The Port of Liverpool, for example, rose from a population of a couple of thousand to many tens of thousands in the space of a century.
