Helps high school students develop the skills necessary to communicate more powerfully through writing and to articulate their thoughts clearly. Develop creative writing skills including descriptive writing, poetry, and short stories. Cultivate the use of expository writing including research papers, analytical essays, problem-solution writing, and firsthand accounts. Learn the art of public speaking, including persuasive speeches, informative speeches, debates, and more. Rhetoric is the ancient skill of persuasive speech used by teachers, preachers, politicians, and others to influence, incite, and instruct. This course includes basic grammar and writing composition, and mastering this time-honored skill will set your students apart with distinguished written and oral abilities. This 34-week, critical-thinking course will take the student through the writing of numerous academic essays, several public speaking presentations, and an extensive research paper. Dr. Stobaugh weaves biblical concepts, readings, and applications throughout the curriculum to help equip students to stand firm in their faith and become the light of Christ in a deteriorating culture.

A remarkable exploration of the best in written works from around the world is at the heart of an amazing new literature series from respected educator and author, Dr. James Stobaugh. Contains concept building exercises for warm-up, suggested reading lists and schedules, writing activities for enrichment, biblical applications and special project and critical thinking exercises. Comprehensive and complete to allow for a year's worth of study. Structured to standalone or be integrated into a comprehensive curriculum, designed to present a strong sample of literature to help the Christian student from a strong and biblical worldview.

Do Commas Matter? Consider the story about my friends were heir to Uncle Josef's estate. Well, Josef wasn't really anyone's uncle, but that's what everyone called him. Uncle Josef's Last Will and testament read, I leave my entire estate to my dear friends Robert, Rosie, Charley and Sophie. The problem? Robert and Rosie filed a lawsuit stating that Charley and Sophie together were due a third of Uncle Josef's estate. Why? Uncle Josef hadn't placed a comma between Charley and Sophie. The judge agreed. Anyone who ever know uncle Josef has been careful about their pauses ever since. At last! A book on punctuation that is not a mere reference book: rather, this book invites readers on a personal journey... meant to be read cover-to-cover, this book effectively takes the mystery out of punctuation and

provides practice on essential writing skills. --Elisabeth Anderson, Writing Instructor, College of DuPage A straight-forward handbook that has been infinitely more useful than any handbook or workbook I've used in college. --Dominie Schiralli, Fine Arts Major, Indiana University Northwest Students who used this method had a much easier time with composition. Because they understood grammar and mechanics, they could focus on building their writing skills. This is a great method producing fantastic results. --Peggy Patlan, Former Director of Education, Fox College The Mechanics of Writing is a manual of basic rules that actually builds writing skills, and my composition students who have used the unique method this book presents sing its praises! --Erika Mikkall, Writing Instructor, Indiana University Northwest

A remarkable exploration of the best in written works from around the world is at the heart of an amazing new literature series from respected educator and author, Dr. James Stobaugh. Contains concept building exercises for warm-up, suggested reading lists and schedules, writing activities for enrichment, biblical applications and special project and critical thinking exercises. Comprehensive and complete to allow for a year's worth of study. Structured to stand alone or be integrated into a comprehensive curriculum, designed to present a strong sample of literature to help the Christian student from a strong and biblical worldview.

The Challenge and Skills Builders are differentiated activity books to be used alongside the Cambridge Primary Science course. Cambridge Primary Science is a flexible and engaging course written specifically for the Cambridge Primary Science Curriculum Stages 1 to 6. The course uses an enquiry-led approach that helps pupils to think and work scientifically. Skills Builders provide consolidation activities for children who need extra learning opportunities to meet the standard for success. They also focus on scientific literacy for ESL children who find this a barrier to learning. A full range of activities help raise a child's scientific literacy and understanding to match their peers, with teacher/parental guidance on key scientific methods and concepts before each exercise.

A remarkable exploration of the best in written works from around the world is at the heart of an amazing new literature series from respected educator and author, Dr. James Stobaugh. Contains concept building exercises for warm-up, suggested reading lists and schedules, writing activities for enrichment, biblical applications and special project and critical thinking exercises. Comprehensive and complete to allow for a year's worth of study. Structured to stand alone or be integrated into a comprehensive curriculum, designed to present a strong sample of literature to help the Christian student from a strong and biblical worldview.

Enjoy beloved classics while developing vocabulary, reading, and critical thinking skills! Each literature book in the series is a one-year course Each chapter has five lessons with daily concept-building exercises, warm-up questions, and guided readings Easy-to-use with suggested reading schedules and daily calendar Equips students to think critically about philosophy and trends in culture, and articulate their views through writing A well-crafted presentation of whole-book or whole-work selections from the major genres of classic literature (prose, poetry, and drama), each course has 34 chapters representing 34 weeks of study, with an overview of narrative background material on the writers, their historical settings, and worldview. The rich curriculum's content is infused with critical thinking skills, and an easy-to-use teacher's guide outlines student objectives with each chapter, providing the answers to the assignments and weekly exercises. The final lesson of the week includes both the exam, covering insights on the week's chapter, as well as essays developed through the course of that

week's study, chosen by the educator and student to personalize the coursework for the individual learner.

This guide teaches readers how to use Dreamweaver UltraDev to build Web sites that incorporate database access. Includes short, concise, and tightly written lessons that cover the key features and components of the product. This book covers Dreamweaver UltraDev version 4.0, plus Flash and Fireworks.

This comprehensive guide will prepare candidates for the test in all 50 states. It includes four complete practice exams, a real estate refresher course and complete math review, as well as a real estate terms glossary with over 900 terms, and expert test-prep tips.

Mitosis/Cytokinesis provides a comprehensive discussion of the various aspects of mitosis and cytokinesis, as studied from different points of view by various authors. The book summarizes work at different levels of organization, including phenomenological, molecular, genetic, and structural levels. The book is divided into three sections that cover the premeiotic and premitotic events; mitotic mechanisms and approaches to the study of mitosis; and mechanisms of cytokinesis. The authors used a uniform style in presenting the concepts by including an overview of the field, a main theme, and a conclusion so that a broad range of biologists could understand the concepts. This volume also explores the potential developments in the study of mitosis and cytokinesis, providing a background and perspective into research on mitosis and cytokinesis that will be invaluable to scientists and advanced students in cell biology. The book is an excellent reference for students, lecturers, and research professionals in cell biology, molecular biology, developmental biology, genetics, biochemistry, and physiology.
