Techopedia explains Lotus Domino. Lotus Domino uses a document-oriented database called a notes storage facility to manage data such as rich text documents (formatted text and images) and other document files with attachments. This database is the central component of the Domino architecture. Core services include the following server functions: Web, database, email, applications, and directory.

What is Lotus Domino? - Definition from Techopedia

HCL Notes (formerly IBM Notes and Lotus Notes; see Branding below) and HCL Domino (formerly IBM Domino and Lotus Domino) are the client and server, respectively, of a collaborative client-server software platform formerly sold by IBM, now by HCL Technologies.
