Earth Science Review Book is user friendly for both the teacher and the student. Since the content is aligned with the New York State Core Curriculum for Physical Setting/Earth Science, a teacher can feel confident that all the required topics are sufficiently developed.The suggested outline of units moves from the concrete material to the more abstract subjects such as meteorology and astronomy. Throughout the book there is ample opportunity for review of basic skills and ways to tie in the various units. For example, isolines are discussed early in the year and then revisited later in the weather topics.The student has the opportunity to use the book as both a reference and a workbook. The extensive number of constructed response items as well as multiple choice questions found interspersed within the topics give ample practice. The multiple Regents Exams found at the back of the book can be used both at the end of the course for review and whenever appropriate throughout the year.

'The Gap-Year Guidebook 2009' has comprehensive advice on travelling, volunteering, working round the world, languages, sports courses, office skills, career breaks and life after the gap year.

An exciting new volume of letters about the Capital of the World—from George Washington, Kahlil Gibran, Audrey Hepburn, Martin Scorsese, and more—from the author of the bestselling Letters of Note collections Peter Schagen writes to the Dutch West India Company about the purchase of "Manhattes." Mayor Ambrose Kingsland urges the city council to create what became Central Park. E. B. White bemoans taxi cab design to Harold Ross, cofounder of The New Yorker. Bianca Jagger sets the record straight about that white horse in Studio 54. New York City goes by many names—Gotham, Empire City, the City That Never Sleeps—and once served as the capital of America. It came together as we know it in 1898 and has become one of the world's most powerful, most important megacities, shaping art, culture, finance, and media across the globe. This iconic collection of thirty letters smartly explores the history of life in the five boroughs. You'll need more than a New York minute to enjoy it all.
