Based on in-depth ethnographic research - and using an approach that seeks to understand how migration is experienced by the migrants themselves - this is a fascinating study of the experiences of women in rural China who joined the vast migration to Beijing and other cities at the end of the twentieth century. It focuses on the experiences of rural-urban migrants, the particular ways in which they talk about those experiences, and how those experiences affect their sense of identity. Through first-hand accounts of actual migrant workers, the author provides valuable insights into how rural women negotiate rural/urban experiences; how they respond to migration and life in the city; and how that experience shapes their world view, values, and relations with others. The book makes a major contribution to our understanding of the relationship between gender and social change, and of the ways in which globalization and modernity are experienced at the most personal level.

Ruiz spent 11 years exploring the villages and botanical landscapes of Peru and Chile. His detailed, personal observations of about 2000 plants, along with his impressions of the culture and perils of exploration in South America, are translated here by Richard Evans Schultes, the premier ethnobotanical explorer of South America today.

Written by experienced professionals, this book provides a state-of-the-art account of the construction of offshore concrete structures. It describes the construction process and includes: "concept definition "project management, "detailed design and quality assurance "simplified analyzes and detailed design

Why does hunger persist in a world of plenty? Ending Hunger Worldwide challenges the naive notion that everyone wants hunger to end, arguing that the powerful care - but not enough to make a difference. George Kent argues that the central focus in overcoming hunger should be on building stronger communities. It is these communities which can provide mutual support to ensure that people don't go hungry. Kent demonstrates that there is not a shortage of food but of what Amartya Sen terms 'opportunities', and that developing tight-knit communities will lead to more opportunities for the hungry and undernourished. Ending Hunger Worldwide challenges dominant market-led solutions, and will be essential reading for activists, NGO workers and development students looking for a fresh perspective.

Designed for daily use as well as for retreats, Digging for God is an invitation to linger in the gardens of the Bible and the gardens of the heart. Using the passages concerning five biblical gardens, and then her own experiences distilled into poetry, Higgins provides meditative ideas and questions as springboards to prayer. For all who have labored and loved their backyard gardens, Higgins' poems will nudge memories. For all who are, as May Sarton said, "hopeful gardeners of the spirit," this volume offers fertile ground for prayer and reflection.

This text is designed to provide a mathematically rigorous, comprehensive coverage of topics and applications, while still being accessible to students. Calter/Calter focuses on developing students' critical thinking skills as well as improving their proficiency in a broad range of technical math topics such as algebra, linear equations, functions, and integrals. Using abundant examples and graphics throughout the text, this edition provides several features to help students visualize problems and better understand the concepts. Calter/Calter has been praised for its real-life and engineering-oriented applications. The sixth edition of Technical Mathematics has added back in popular topics including statistics and line graphing in order to provide a comprehensive coverage of topics and applications--everything the technical student may need is included, with the emphasis always on clarity and practical applications.

The book is the translation of the diaries of Hipolito Ruiz, early botanical explorer of South America, who spent 11 years exploring the towns, villages, fields, forests, and mountains of Peru and Chile from 1777 to 1788. Newly translated by Richard Evans Schultes, the Journals offer valuable information for modern-day readers. Descriptions of about 2000 plants, fully indexed in the book, make the Journals an extensive botanical resource, while observations of landscape, weather, and native cultures create a unique historical picture for students of geography, geology, anthropology, and colonial history. As a historical find, the Journals are a remarkable document. Recounting the first of a series of Spanish expeditions to the New World, the story they tell is one of great sacrifices and hardship in the name of science. Bad weather, fatigue, and all the dangers of travel in the wilds were endured, as well as disasters including the death of artist Jose Brunete and the loss of a manuscript to fire. In the scientific realm, Ruiz's studies may be considered ground-laying work in the discipline of ethnobotany. By relating the uses of plants by natives, such as the extraction of quinine for the treatment of malaria, to his description of the plant in its native environment, Ruiz employed methods central to modern science.
