Compare the potential energy of several objects when you place them on shelves of different heights. Learn that two objects at different heights can have the same potential energy, while two objects at the same height can have different potential energies. Time's Up! As a guest, you can only use this Gizmo for 5 minutes a day.

Using the Potential Energy on Shelves Gizmo, you will discover how gravity gives objects potential energy because of their position above the floor. 1. Which object on the SIMULATION pane most likely has the least potential energy? Why? The ball has the least amount of potential energy. It has 0 J. 2. Click on the TABLE tab. The potential energy (PE) of each object is given in joules (J). List the objects in order from lowest to highest potential energies.
