SBR Product Information Super Barrier Rectifier: An Evolution

In Power Rectifier Technology. A central component to a

power circuit, or any type of circuit where a signal needs to be

conditioned is a rectifying diode. Traditionally diodes from one

of two families are used in these applications: the pn-junction

diode and the Schottky Barrier diode. These technologies are

well-established in circuit design and form the basis of most

IC fabrication techniques.

~~SBR Product Information—Diodes Incorporated~~

Super Barrier Rectifier (SBR) is a proprietary and patented

Diodes Inc technology that utilizes a MOS manufacturing

process (traditional Schottky uses a bipolar process) to create

a superior two terminal device that has a lower forward

voltage (VF) than comparable Schottky diodes while

possessing the thermal stability characteristics of PN p x l d.
