This book presents innovative instructional interventions designed to support inquiry project-based learning as an approach to equip students with 21st century skills. Instructional techniques include collaborative team-based teaching, social constructivist game design and game play, and productive uses of social media such as wikis and other online communication affordances.

The book will be of interest to researchers seeking a summary of recent empirical studies in the inquiry project-based learning domain that employ new technologies as constructive media for student synthesis and creation. The book also bridges the gap between empirical works and a range of national- and international-level educational standards frameworks such as the P21, the OECD framework, AASL Standards for the 21st Century Learner, and the Common Core State Standards in the US. Of particular interest to education practitioners, the book offers detailed descriptions of inquiry project-based learning interventions that can be directly reproduced in today's schools. Further, the book provides research-driven guidelines for the evaluation of student inquiry project-based learning. Lastly, it offers education policymakers insight into establishing anchors and spaces for applying inquiry project-based learning opportunities for youth today in the context of existing and current education reform efforts. The aim of this book is to support education leaders', practitioners' and researchers' efforts in advancing inspiring and motivating student learning through transformative social constructivist inquiry-based knowledge-building with information technologies. We propose that preparing students with inquiry mindsets and dispositions can promote greater agency, critical thinking and resourcefulness, qualities needed for

addressing the complex societal challenges they may face.

The fifth edition of Professional Issues in Speech-Language Pathology and Audiology is a singularly comprehensive resource for students in speech-language pathology and audiology as they prepare for their professional careers. It also serves as a timely source of information for both practitioners and faculty, serving as an updated "state of the professions" desk reference. The book is divided into four major sections: overview of the professions; employment issues; setting-specific issues; and working productively. The information presented in each section provides the reader with a better understanding and a new perspective on how professional issues have been affected by both internal and external influences in recent years including technological advances, demographic shifts, globalization, and economic factors. Chapter authors are recognized subject matter experts, providing a blend of both foundational and cutting-edge information in areas such as evidence-based practice, ethics, finding a job, interprofessional

practice, service delivery in healthcare and education, technology, cultural competence, supervision, and leadership. Students reading this book will appreciate how the professions have evolved over time while acquiring a sense of where they are right now as they prepare to enter the professional world. Each of the topics covered in the book will continue to play important roles in the future of audiology and speech-language pathology, providing early career professionals with the requisite knowledge to achieve success in any setting. New to the Fifth Edition: * New coeditor Mark DeRuiter, PhD, MBA, CCC-A, CCC-SLP * 5 new chapters including Professional Accountability (Shelly Chabon and Becky Cornett); Safety in the Workplace (Donna Fisher-Smiley and Cynthia Richburg); Interprofessional Education and Interprofessional Practice (Alex Johnson); Counseling (Michael Flahive); and Advocacy (Tommie Robinson and Janet Deppe) * New authors Tricia Ashby, Bob Augustine, Stacy K. Betz, Janet Deppe, Cathy DeRuiter, Mark DeRuiter, Robin Edge, Susan Felsenfeld, Liza Finestack, Michael Flahive, Carolyn Higdon, Kelly M. Holland, Shirley Huang, Susan Ingram, Marie Ireland, Jeffrey Johnson, Pui Fong Kan, Lemmietta McNeilly, Lissa Power deFur, Gail Richard, Steve Ritch, Lisa Scott, and Tina Veale * Critical thinking questions at end of each chapter for classroom discussion and examination * Updated table of chapter content relevant to the Council for

Clinical Certification standards for ASHA Certificate of Clinical Competence * Updated acronyms glossary * Updated figures and tables * Updated and expanded references Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

A comprehensive guide for college-bound teens and their parents shares step-by-step coverage of today's competitive admissions processes based on expert advice by 50 admissions deans from ivy-league universities, in a reference that outlines recommendations for the sophomore, junior and senior grades of high school. Original.

March, September, and December issues include index digests, and June issue includes cumulative tables and index digest.

The golden standard evaluation reference text Now in its second edition, Evaluation Theory, Models, and Applications is the vital text on evaluation models, perfect for classroom use as a textbook, and as a professional evaluation reference. The book begins with an overview of the evaluation field and program evaluation standards, and proceeds to cover

the most widely used evaluation approaches. With new evaluation designs and the inclusion of the latest literature from the field, this Second Edition is an essential update for professionals and students who want to stay current. Understanding and choosing evaluation approaches is critical to many professions, and Evaluation Theory, Models, and Applications, Second Edition is the benchmark evaluation guide. Authors Daniel L. Stufflebeam and Chris L. S. Coryn, widely considered experts in the evaluation field, introduce and describe 23 program evaluation approaches, including, new to this edition, transformative evaluation, participatory evaluation, consumer feedback, and meta-analysis. Evaluation Theory, Models, and Applications, Second Edition facilitates the process of planning, conducting, and assessing program evaluations. The highlighted evaluation approaches include: Experimental and quasi-experimental design evaluations Daniel L. Stufflebeam's CIPP Model Michael Scriven's Consumer-Oriented Evaluation Michael Patton's Utilization-Focused Evaluation Robert Stake's Responsive/Stakeholder-Centered Evaluation Case Study Evaluation Key readings listed at the end of each chapter direct readers to the most important references for each topic. Learning objectives, review questions, student exercises, and instructor support materials complete the collection of tools. Choosing from evaluation approaches can be an

overwhelming process, but Evaluation Theory, Models, and Applications, Second Edition updates the core evaluation concepts with the latest research, making this complex field accessible in just one book.
