Web 3.0 is the third generation of internet services for websites and applications that will focus on using a machine-based understanding of data to provide a data-driven and semantic web. The ultimate goal of Web 3.0 is to create more intelligent, connected and open websites. Web 3.0 has not yet been implemented, so there is no solid definition. It took over ten years to transition from the original web, Web 1.0, to Web 2.0, and it is expected to take just as long, if not longer, to fully ...
