Hildebrand Solution

Methods Applied Mathematics

Hildebrand Solution

$$u(x) = a \sin(x - p) + b \cos(x - p)$$

where  $a$  and  $b$  are determined uniquely by the boundary conditions. This is a very rapidly oscillating function over the entire interval. To apply perturbation methods we set  $\epsilon = 0$  to get the outer solution  $u(x) = 0$ . This constant solution cannot be matched to rapid oscillations.
