Problem 3 Solution

| dbFin

Solution: Let τ be the topology on X . Take $z \in \text{int}(A \cap X)$. So $z \in O \cap X$ such that $O \cap A$. But then $z \in O \cap Y$, which is open in Y , and $O \cap Y \subseteq A$ since $O \cap A$. Thus, $z \in \text{int}(A \cap Y)$. To see that equality need not hold, consider $X = \mathbb{R}$, $Y = [0; 1]$

Topology

and $A = (1=2;1]$.

We then have $\text{int}(A \cap X) = (1=2;1)$

whereas $\text{int}(A \cap Y) = (1=2;1]$. [6 marks]
