Since their publication nearly 40 years ago, Beer and Johnston's Vector Mechanics for Engineers books have set the standard for presenting statics and dynamics to beginning engineering

students. The New Media Versions of these classic books combine the power of cutting-edge software and multimedia with Beer and Johnston's unsurpassed text coverage. The package is also enhanced by new problems supplements for

both statics and dynamics. For more details about the new media and problems supplement package components, see the "New to this Edition" section below.

A primary objective

Page 50/63

Download File

PDF Vector

in a first course in mechanics is to help develop a student's ability first to analyze problems in a simple and logical manner, and then to apply basic principles to their solutions. A strong conceptual understanding of these basic mechanics

principles is essential for successfully solving mechanics

problems. This edition of Vector Mechanics for

Engineers will help instructors achieve these goals.

Continuing in the spirit of its successful previous editions, this edition

The 12th edition

has new case

studies and

enhancements in the text and in Connect. The hallmark of the Beer-Johnston series has been the problem sets. This edition is no different. Over 650 of the homework problems in the text are new or revised. One of the characteristics of

PDF Vector

the approach used in this book is that mechanics of particles is clearly separated from the mechanics of rigid bodies. This approach makes it possible to consider simple practical applications at an early stage and to postpone the introduction of the

concepts.

Additionally,

Connect has over

100 Free-Body

Problems and

Process-Oriented

Problems. McGraw-

Hill Education's

Connect, is also

available. Connect

is the only

system that empowers students by continuously adapting to deliver precisely what they need, when they need it, how they need it, so that class time is more effective. Connect allows the professor to assign homework, quizzes, and tests easily and

student's work.

Problems are

also have a "multi-
